Rachel's shock

Rachel is shocked by what happens next.

Our philosophy is, therefore, to use instructional tools and techniques that will move learners around an awareness cycle from the point at which they are merely aware of policy requirements to the point where they are committed to act upon them.

Looking Ahead

Measurement and Evaluation

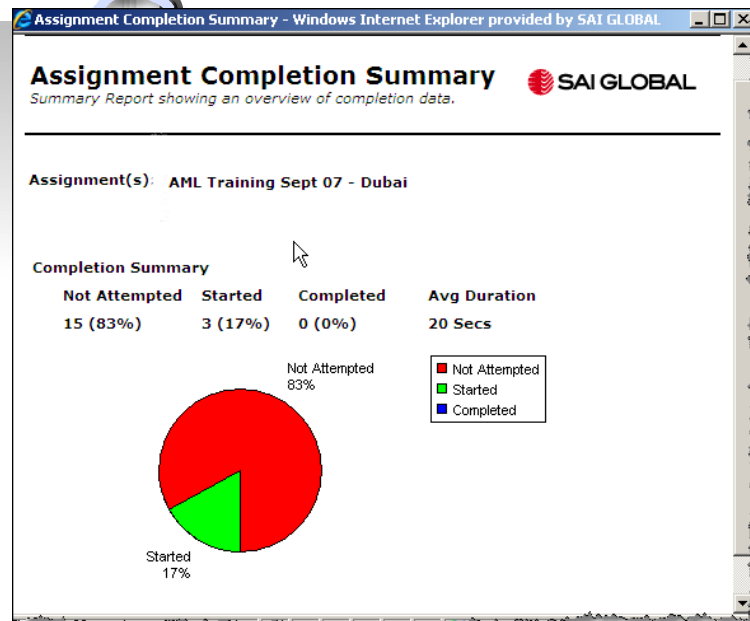

- **Attitudes** - how employees feel about compliance, whether it seems important and their disposition to act
- **Knowledge** – understanding of compliance issues and requirements
- **Behaviour** - key to compliance and is a result of employees putting their attitudes and knowledge into practice.

Effective compliance training addresses all three elements
