Photo - The Sultan of Perak - Sultan Nazrin Muizzuddin Shah ibni Almarhum Sultan Azlan Muhibbuddin Shah Al-Maghfurlah - presents the 'Cyber Security Organisation of the Year' award to Huawei's representative at the 4th Cyber Security Malaysia - Awards, Conference and Exhibition. Standing to the left of the Sultan are (from left) Yang Amat Berhormat Dato' Seri DiRaja Dr. Zambry bin Abd Kadir, the Chief Minister of Perak, and General Tan Sri Dato' Seri Panglima Mohd. Azumi bin Mohamed (Retired), Chairman of CyberSecurity Malaysia.

China's ICT solutions provider Huawei was named 'Cyber Security Organisation of the Year' by Malaysia's national cyber security specialist CyberSecurity Malaysia during the fourth edition of CSM-ACE [Awards, Conference and Exhibition] held recently in Ipoh, Malaysia.

During the presentation of the award on 13th November 2014, CyberSecurity Malaysia chief executive officer, Dr Amirudin Bin Abdul Wahab, said, "We congratulate Huawei for its tireless contribution to raising the standards of cyber security in the industry."

"Cyber security becomes more and more complicated under the global supply chain," said Dr Amirudin. "It requires all parties, including government regulators, operators, vendors and even individual users to manage and reduce the threat from cyber space. I'm very pleased to see that Huawei has developed and implemented a comprehensive built-in end-to-end cyber security system, including aspects from strategies, management and control, standard and process, human resources, verification and to supplier management."

"I encourage more and more Malaysian organisations and companies to follow Huawei's initiatives, adopt cyber security best practices and build a more resilient network in Malaysia to fuel sustainable economic growth," he added.

Huawei's global cyber security officer, John Suffolk, said the company was honoured to receive the award. "Huawei has been providing innovative and reliable solutions to continuously create business value for our Malaysian customers, since its establishment in Malaysia in 2001."

"Huawei places the highest priority on cyber security, our commitment to cyber security always outweighs commercial interests," said Suffolk. "We will be more than happy to share our end-to-end cyber security system, built-in process oriented management methodologies, and 'Assume nothing, Believe nobody, Check everything' approach with our customers. Huawei looks forward to working further with Malaysian government organisations and customers to provide the best-possible security assurance and ensure a safer and more secure cyber world for all."

Huawei, which has 1,900 staff in Malaysia, serves all major telecom operators in Malaysia and contributes to the High Speed Broadband (HSBB), 4G and other ICT initiatives in the country.
