Who should attend?
CIO, COO, CTO, CSO, IT Manager, Auditors and Audit Consultants, IT Systems Administrator, Information Security Consultants.

PCI DSS – Payment Card Industry Data Security Standard is a compliance requirement, which aims to ensure that all cardholder information is always stored, processed and transmitted securely.

Why has PCI DSS been introduced? PCI DSS council comprising of Visa Inc, MasterCard Worldwide, JCB International & Discover Financial Services have become increasingly concerned with the level of security protecting businesses' account and transaction information.

Who needs to become compliant? All merchants who banks, insurance, hotel , hospitals, store i.e process or transmit cardholder data must comply with the standard.

Time-limited: Visa will require acquirers to provide an Attestation of Compliance Form for each of their Level 1 merchants demonstrating that each merchant has validated PCI DSS compliance by September 30, 2010. After this date, Visa will impose appropriate risk controls, up to and including fines, on acquirers that fail to provide an attestation form to Visa confirming that each of its Level 1 merchants has validated PCI DSS compliance.

Speakers Profile:

Dr. Jean Rioux, Head of IT Security, TUV Rheinland, QSA, PCI DSS Assessor
Dr. Jean-Guy Rioux has over 35 years of experience in the field of Information and Communications Technology (ICT). After nearly 20 years as a Signal Intelligence technologist, Electronic Warfare specialist, and Intelligence analyst with the Naval Branch of the Canadian Forces (CF, 1971~1989), he spent several years researching and developing ICT solutions for major North American and Japanese.

Capt. Rajkumar, CEO, Macrofirm Technology, Information Security Auditor
He has over 10 years of auditing, training and consulting experience across the ASEAN region, a certified auditor of several management systems. He was a primary player in bringing ISO 20000 to Malaysia and had assisted an MSC status company to be certified to ISO 20000, a standard for IT Service management, the first 20000 certificate in ASEAN region

Mustaffa Zuheir Faras Mohammed, IT Security Specialist & Security Trainer
He has over 15 years of IT experience in countries like US and middle east, Award winner of Sun Microsystems and IBM programming competitions, designer and implementer of the first real estate portal in the Middle East, designer and implementer of e-Gov portal MYeG, Lecturer in Multimedia University, EC Council trainer on security and data mining.

Jeffery Kok- RSA Security
With more than 10 years experience in the security industry, Jeffery Kok is currently Strategic Solutions Consultant in RSA, The Security Division Of EMC, based in Singapore. Jeffery holds a CISSP certification and specializes in Cryptographic Solutions, Network security, Ethical Hacking and Network Infrastructure Security Assessment.
