MEDIA RELEASE

29 January 2013 REF: CBMR-5-RFI-7-APCERT-V1

FOR IMMEDIATE RELEASE

APCERT EMBARKS ON GLOBAL COORDINATION TO MITIGATE LARGE SCALE DENIAL OF SERVICE ATTACK

(KUALA LUMPUR) - The Asia Pacific Computer Emergency Response Team (APCERT) today has successfully completed its annual drill to test the response capability of leading Computer Security Incident Response Teams (CSIRT) from the Asia Pacific economies. For the second time, APCERT involved the participation of members from the Organisation of the Islamic Cooperation – Computer Emergency Response Team (OIC-CERT) in this annual drill, following a Memorandum of Understanding on collaboration signed in September, 2011.

The theme of the APCERT Drill 2013 was "Countering Large Scale Denial of Service Attack". The exercise reflects real incidents and problems that exist on the Internet. The teams were tested not only to go beyond identifying a large Denial of Service attack on various companies and governments as a symptom of the problem, but also to analyze the root causes and remove malicious elements from the Internet, in the minimum amount of time.

During the exercise, the participating teams activated and tested their incident response handling arrangements, locally and internationally, in order to mitigate the impact of Denial of Service (DoS) attacks that involved large scale propagation of malicious software acting to impair critical infrastructure and economic activities. This incident response exercise, which was coordinated across many economies, reflects the strong collaboration amongst the economies and validates the enhanced communication protocols, technical capabilities and quality of incident responses that APCERT fosters in assuring Internet security and safety.

22 CSIRT teams from 18 economies (Australia, Bangladesh, Brunei Darussalam, People's Republic of China, Chinese Taipei, Hong Kong, India, Indonesia, Japan, Korea, Macao, Malaysia, Myanmar, New Zealand, Singapore, Sri Lanka, Thailand and Vietnam) of the APCERT and 4 CSIRT teams from 4 economies (Egypt, Pakistan, Oman and Tunisia) of the OIC-CERT participated in the drill.

CyberSecurity Malaysia, the national cyber security specialist agency under the purview of Malaysia's Ministry of Science, Technology and Innovation (MOSTI) has always been a key player in APCERT Drill since 2005.

"We have been looking forward to this year's drill. To be an integral part of the APCERT annual drill is an excellent opportunity for our emergency response team to regularly test their technical skills and capabilities in handling cyber threats. I believe the annual APCERT Drill reinforces as well as strengthens the collaboration among the participating economies and will further improve communications among the members", said its Chief Executive Officer, Dr. Amirudin Abdul Wahab.

Dr. Amirudin added "We are also delighted to see the participation of OIC-CERT in the Drill and we would like to extend our gratitude to APCERT for engaging OIC-CERT again in this year's drill. We hope both entities will be able to sustain their close working relationships and to further improve information sharing in handling cyber threats."

About APCERT

APCERT was established by leading and national Computer Security Incident Response Teams (CSIRTs) from the economies of the Asia Pacific region to improve cooperation, response and information sharing among CSIRTs in the region. APCERT consists of 30 CSIRTs from 20 economies. Further information about APCERT can be found at: <u>www.apcert.org</u>.

About OIC-CERT

OIC-CERT was established in January 2009, to provide a platform for member countries to explore and to develop collaborative initiatives and possible partnerships in matters pertaining to cyber security that shall strengthen their self reliant in the cyberspace. OIC-CERT consists of 26 CERTs, cyber security related agencies and professional from 18 economies. Further information about OIC-CERT can be found at: <u>www.oic-cert.net</u>.
